

BLOCK CUTTER

BC-Series Block Cutter will cut most paving materials available on the market made from concrete, clay, stone, granite, etc.

The cutting height is adjustable by a hand operated adjustment screw, which allows the sprung stop blade to fit snug to the tile surface. The canter lever action causes the cam to apply a uniform & central pressure, which ensures that the machine is stable whilst in operation.

The hardened steel blades produce clean and perfect cuts, quickly and efficiently as well as having a long life.

Model	BC-14
Block Width (mm)	380
Block Dimension (LxWxH) (mm)	22 x 22
Block Thickness (mm)	10 – 100
Weight (kg)	49
Dimension (LxWxH) (mm)	1010 x 270 x 550
