

WELDING MACHINE

MIG-250-21

Efficient & Effective

PORTABLE WELDING MACHINE

Welding Machines generate heat that melts metal parts, so that these parts can be joined.

Application:

- Weld Stainless Steel
- Alloy Steel
- Carbon Steel
- Or other non ferrous metal

Features:

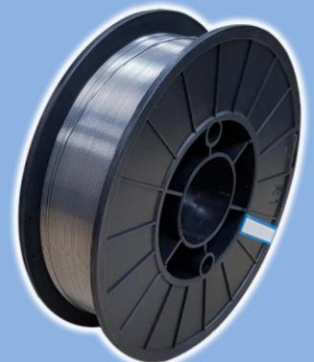

- Excellent Welding Performance
- Portable and Light Weight
- Superb Welding Control
- Ideal for Maintenance
- Over heating protection
- Low power consumption
- Durable
- Adjustable output current ranging

Accessories included:

- Welding Cable with Electrode Holder.
- Earth Cable with Earth Clamp.
- 3M MB IS MIG Torch.
- Welding Hand Shield.
- Wire Bush

1.0MM GASLESS WELDING WIRE 5KG

Model		MIG-250-21				
		MIG	30A/15.5V-250A/26.5V			
		MMA	30A/21.2V-230A/29.2V			
		X	60%	100%		
		Model	MIG	MMA	MIG	MMA
		I2	250A	230A	194A	178A
		U2	26.5V	29.2V	23.7V	27.1V
		I1 max = 38.2A		I1 eff = 29.6A		
Cooling way: WIND					IP21S	

QUALITY
