

# Efficient & Effective

## WALKING TRACTOR / CULTIVATOR

The walking tractor is for farm implement or machine designed to stir the soil around a crop.

### Function:

- Scratches the soil to a given depth to pull and pulverize the weeds and their roots.
- Helps aerate the soil structure after cultivation/tilling.
- Improve soil structure.

### Features:

- The cultivator (DF-121) is of dual-function type that can be used as a means of traction as while driving.
- Its feature by its simple and compact structure, good reliability, long service life, easy operation, ample output, lightweight and good cross-country ability.

Model	DF121
Engine Model	S195G
Rated Output (Kw)	9
Wheelbase (mm)	570 ~ 1090
Minigroud Clearance (mm)	210
Tyre Size	6.00 ~ 12
Weight (kg)	360
Overall Dimensions (LxWxH) (mm)	2950 x 980 x 1240

	Forward					Reverse		
	1st	2nd	3rd	4th	5th	6th	1st	2nd
Rubber Wheel	1.39	2.47	4.15	5.14	9.12	15.30	1.10	4.10
Iron Wheel	1.83	3.26	5.49	6.8	12.06	20.24	1.45	5.42
