

Efficient & Effective

MORTAR PUMP

Features:

- Compact design consists of Mixer, Stone Filter, Hopper Mixer and Peristaltic Pump.
- Mechanical operated with electrical speed control to meet all job demands.
- Enables pumping of heavy, fibered, thick and abrasive materials at high volumes.
- The pump's mechanical maintenance is limited to hose wear. Pumped material does not come in contact with any moving parts.
- With a symmetric design, forward motion of material is constant, thus eliminating back pressure and is perfectly reversible.
- Replacement of hose is quick and easy.
- Heavy Duty chassis and tough construction.
