

Efficient & Effective

SUBMERSIBLE SEWAGE PUMP

Application:

• **Submersible Sewage Pumps (KS-series)** are widely used in agriculture architecture, mine, environment protection and industry, such as drainage slurry, waste water, which contained short fiber wastepaper, sand and so on, it is also an ideal equipment for irrigation.

Features:

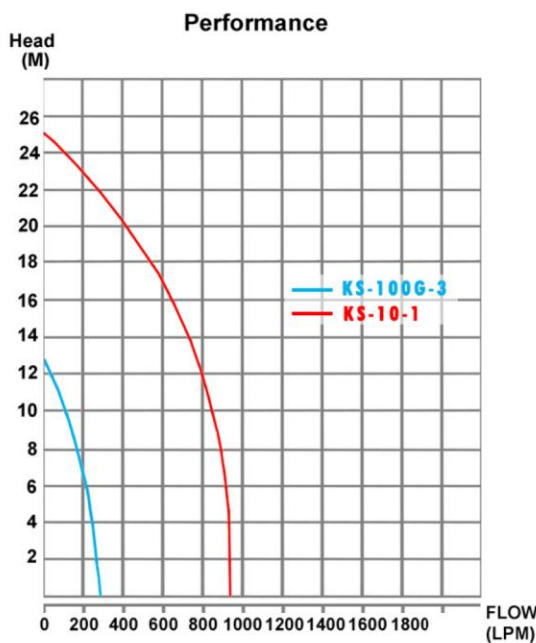

- IP68 protection and F class insulation.
- Low temperature rising durable for long service life.
- Built in thermal overload protector.
- Durable mechanical seal.
- High efficiency hydraulic suction for energy serving.

KS-10-1

KS-100G-3

(MADE IN TAIWAN)

Model	KS-10-1	KS-100G-3
Power (kW)	0.75	7.5
Voltage	Single Phase 240v	Three Phase 415v
Flow Rate (l / min)	240	900
Max Head (m)	13	25
Output	2"	6"
Weight (kg)	21	70
Dimensions (LxWxH) (mm)	290 x 180 x 425	550 x 310 x 610
