

## Efficient & Effective

### THERMOPLASTIC PREHEATER

**Thermoplastic Preheater** is used for preheating, melting, and stirring paint continuously, preparing hot melt materials for the thermoplastic machine during long distance road lines marking work. Good thermoplastic melter for road marking.

<b>Model</b>	<b>TKTP-220</b>
Capacity	220 Liter
Heating System	Bottle LPG, Direct Heating
Agitator	Engine Powered Mechanical Agitator
Engine	<b>Changchai CC 186</b>
Engine Type	Air-Cooled Diesel
Max. Output (hp/rpm)	6 / 3600
Starting System	Recoil
Weight (kg)	650
Dimensions (LxWxH) mm	1670 x 1140 x 1420
